In hospital database

Volume - Collection of hospital database

Velocity - patient records, doctor records

Variety - Structured data - pharmacy
                Unstructured - Tests

Varacity - accuracy & quality

value - research [Raw data into insights]

Hospital-Database	Volume	Velocity	Variety	Veracity	Value
	[collection of hospital database]	[Store patient result & test result where it generates at high speed]	[Struct-all excel data, Semi-log, Unstruct-Image (Scans)]	[Result accuracy, trust worthiness]	[disease deduction, Better treatment, Reduced cost]

College Database -

Volume	Velocity	Variety	Veracity	Value
[Student records, faculty details, Results, library records]	[online exam submission, attendance updation, fees payment]	[struct-Studenttables, marks, fees, Semi-forms, Unstruct-Pdf, reports, ID cards,]	[Errors in manual entry, outdated info]	[performance analysis, placement prediction]

Employee Database -

Volume	Velocity	Variety	Veracity	Value
[Large amt of employee, (persol, Payroll, attendance)]	[Regular updates like attendance, salary processing, Promotions]	[struct-tables, Semi-forms, unstruct-documents]	[Accuracy may vary due to Manual entry]	[Useful for HR decisions]

Social media
Any Technology

Social Media - Instagram -

Volume- Massive amount of posts, photos, videos and comments.

Velocity- Data generated and updated in real time.

Variety- Images, videos, text, reels.

Veracity- Information reliability varies, fake or misleading content exist.

Value- Useful for marketing, trend analysis.

Technology - AI

Volume- Large datasets used for training & learning.

velocity- Data processed & updated in real time.

variety- Text, audio, video, images.

veracity- Data quality may vary, noisy.

value- Enables automation, prediction & smarter decision.
